

PDF Generator – Knowledge Base Document

This document provides an overview of the PDF Generator web application. The purpose of this platform is to allow users to convert different types of files into PDF format easily and efficiently.

Main Features

- Text to PDF: Users can upload plain text files and convert them into PDF format.
- Image to PDF: Users can upload image files and transform them into high-quality PDF documents.
- Document to PDF: Users can upload supported document files and convert them into PDF format.

How It Works

1. The user visits the homepage of the PDF Generator application. 2. The user selects one of the available conversion options. 3. The system redirects the user to the appropriate upload page. 4. The user uploads the file. 5. The system processes the file and generates a downloadable PDF.

Purpose of the Application

The PDF Generator application is designed to simplify document conversion for users. It provides a clean and user-friendly interface that allows quick access to conversion tools without requiring technical knowledge.
