

Remindly - Customer Knowledge Base & Chat FAQs

Welcome to Remindly!

Remindly is a smart reminder assistant that helps users schedule tasks, manage daily activities, and receive timely push notifications through a simple chat interaction. Customers can interact with the chatbot naturally to create reminders, update schedules, and receive instant reminder alerts.

1. What Can Customers Do with Remindly?

- Create reminders quickly through chat interaction.
- Schedule tasks with a title and reminder time.
- Receive push notifications automatically.
- Manage multiple reminders easily.
- Interact naturally with the chatbot without complex forms.

2. How Remindly Works

Customers simply type their reminder request in the chat window. The chatbot understands the task title and reminder time, then schedules the reminder automatically. At the specified time, the customer receives a push notification about the task.

3. Chat Interaction Flow

- Step 1: Open the Remindly chat widget.
- Step 2: Type a reminder request.
- Step 3: The chatbot confirms the reminder details.
- Step 4: The reminder gets scheduled automatically.
- Step 5: A notification is sent at the scheduled time.

4. Example Customer Chat Interaction

Customer: Remind me to attend the team meeting tomorrow at 10 AM.

Remindly Bot: Sure! Your reminder "Team Meeting" has been scheduled for tomorrow at 10:00 AM.

Customer: Remind me to submit the project report today at 5 PM.

Remindly Bot: Done! I will remind you today at 5:00 PM.

5. Push Notification Example

Notification Title: Reminder Alert

Notification Message: "Your scheduled task 'Submit Project Report' is due now."
